(*d*) whether the level is suitable for the supply of Cauvery-Mettur Project water south of Vellar and whether Government are prepared to give supply through the same channel to the villages supplied before?

THE HON. SRI N. RANGA REDDI :—" (*a*) Yes.

" (*b*) & (*c*) The Cauvery-Mettur Project water was supplied to the tanks to the south of the Vellar river through the existing Korambu channels and through a channel dug by the ryots owning lands under the Ponbethi chain of tanks. Though the cost of digging the new channel was met by the ryots themselves, the expenditure on the provision of pipes required for supplying water to the tanks was met by Government, and therefore, it cannot be said that the irrigation in respect of the lands served by the new channel dug by the ryots was done entirely at the cost of the ryots. Water-cess was levied from them at the usual rates. The ryots had also agreed to the payment of the cess.

" (*d*) Yes, if the supply in the river permits it."
